Lake Wales, FL 33853**

1. Lake Wales Envisioned - Hands-On Design Session

**Hands-On Design Session, April 15<sup>th</sup> from 9am-12pm**

Location: James P. Austin Community Center

The centerpiece of the charrette week is the Hands-on Design Session. This Saturday morning session is fun, interactive, and essential to identifying common goals and gathering input! The goal of the Hands-on Design Session is for the community to come together and work alongside one another with the planning team and develop a short and long-range vision for the future of Lake Wales. The session will include a brief presentation followed by mapping and visioning exercises at tables, with continual opportunities throughout the morning to provide input. By marking up maps and discussing and drawing specific ideas, the session helps to dive into the details of the plan and inform specific actions to implement the vision.
